

YTM

High precision yarn tension meter

The YTM is a digital yarn tension meter for an easy way to measure the actual yarn tension of knitting machines. In an extended mode it can display the average and peak tension of the measurements.

Technical Data

Power supply:	9 V block battery
Display:	LCD; 3 characters; height 9 mm
Max. yarn speed:	900 m/min
Battery life:	70 hours (approx.) in normal service
Yarn tension:	0,5 - 25 cN (average or peak value)
Accuracy:	± 2 % of max. measuring range
Weight: approx.	190 g

Applications	
■ Circular knitting machines	■ Flat knitting machines
■ Hosiery knitting machines	■ Warp knitting machines
■ sock machines	■ Seamless knitting machines

Advantages

- Portable unit to measure yarn tension of any knitting system
- High precision even for Elastane yarns
- Automatic zero calibration before measuring
- Easy handling with only one button
- Average and peak function

Also available: YTM 100

Yarn tension: 0,5 - 100 cN (average or peak value)
Accuracy: ± 2 % of max. measuring range
